

SHAHUL HAMEED J

Flutter Developer

Mobile: (+91) 7397629607

Email: shahul5.it@gmail.com

SUMMARY

Flutter developer with 3+ years of experience facilitating effective engineering solutions with a wide range of e-commerce applications , Inventory management , Knowledge in social media application development and technology skills.

Proven ability to leverage the full-stack knowledge and experience to build interactive and user centered mobile application designs. Extensive expertise in clean architecture management and life cycle of rest API development and its integration approaches. Having knowledge in flutter testing and app automation. Currently working on the PSYCARE online application.

LANGUAGES: Dart, Golang , Angular Dart and Code Igniter

DATABASES: MySQL, HeidiSQL

FRONTEND FRAMEWORKS: Flutter , HTML

CLOUD IAAS: Digital Ocean

DEPLOYMENT: Docker, Kubernetes

MESSAGE SERVICE: Firebase messaging

GATEWAYS: Stripe, Razorpay

OS: Windows, Mac

VERSION CONTROL: Git and Bitbucket

IDE: Vs code, Android Studio

STATEMANAGEMENT: BLOC Pattern, GETX and RiverPod

CICD Pipeline : Jenkins, Semaphore-fastlane and Appcircle

TESTING: Widget test, Unit test and Integration test

HOSTING: Firebase

EMPLOYMENT HISTORY

Flutter Developer at KAPTAS Technologies | Jun 2022 - Present

- Prototyping and design of Screen UI
- Taking ownership of product deliverable
- Maintaining Effective Performance via MVC Pattern
- Writing reusable code and meet coding standards
- Enforcing best practices on State Management
- Extensive skills in Exception Handling.
- Clear architecture with sample test cases implementation.

Flutter Developer at Ad Intra Loggs | Nov 2019 – Jun 2022

- Integrating data from various back-end services like GraphQL, NodeJS and Golang
- Maintaining Code Reusability.
- Effective State management By MVC Patterns BLOC , GETX
- Experimented with front end and back-end
- Knowledge in REST API Service Using Golang
- Supporting the team to analysis the Technical Issues.
- Maintaining the design principles entire the project.

ACADEMIC PROFILE

Rathinam Technical Campus, Coimbatore, Bachelor of Information Technology - 2019

NOTABLE PROJECTS

Lightning 360

- Providing Role Based Access Control for different users.
- Inventory management.
- Efficient request creation and deep follow through from low level users to admin level users.
- Preventive maintenance support.
- Core feature is Asset management and Task management.

- Efficient tracking defects in assets
- Raising a tickets to tracking the tasks.
- Attendance history analysis for all users.
- Providing allocation and deallocation of assets.

Technologies used: Dart, Firebase Messaging Service, Pub Packages for Speech recognition to create tasks.

Geco for Kaptas Technologies (Group of Companies)

- Providing Employee role-based Services
- Leave Requests are Created and Approved by Immediate Supervisor
- Modules are Leave Request, Vehicle Request, Meeting Rooms, Appointments and Petty Cash. These modules had request and approval mechanism. Employees can create request and immediate supervisors can approve the requests based on roles and responsibilities.
- Establishment of Push notification for request tracking.
- Task management with current status handling

Technologies used: Dart, Firebase Messaging Service, Pub Packages for Reminder functionality in Appointment Booking.

Engaje (Ecommerce Platform)

- Capable of ordering best products across the community and based on user location within the radius
- Core features: **Ordering, Appointment booking and Handyman service booking**
- Customer reliable solution, Connecting community to the customers and tenants.
- Order tracking to make product deliverable

Technologies used: Dart, Google Location API, Firebase Authentication and Firebase Messaging, Golang, GraphQL, Digital Ocean, Docker, Provider for State management.

Nearle Commerce (Neighborhood commerce)

- Great exploration of business from small area to large community
- Capable of ordering best products through online
- Provides analysis about customers and helps to promote best products to all customers via promotions.
- Order tracking to make product deliverable
- Based on the Category service provided to the tenants and customers.
- Tenants Live location capturing for providing right service to the right customer at the moment.

Technologies used: Dart, Google Location API, Firebase Authentication and Firebase Messaging, Golang, GraphQL, Digital Ocean, Docker, BLOC Pattern for State management.

InvestMates (Social networking platform)

- Explore collaborative ideas and trade topics
- Any user can easily get ideas from experts
- Users can get essential information about investment via follow trending investors
- It helps to connecting the people to share their investment strategies.
- Providing Current trade analysis to the community users.

Technologies used: Dart, Twelve Data API, City Falcon API, Firebase Authentication, Golang, GraphQL, Digital Ocean, Docker, GETX for State management.
