Dynamic and results-driven Senior Flutter Developer with over of **5 years' experience** in designing, developing, and deploying high-performance mobile and web applications. **Proficient in Dart and Flutter frameworks, with a strong focus on creating seamless user experiences and responsive interfaces.** Expertise in **integrating RESTful APIs, managing state with GETX, Provider, River pod and Bloc patterns,** and utilizing modern development tools such as **Git, Firebase, and CI/CD pipelines.** Proven ability to lead cross-functional teams, mentor junior developers, and deliver projects on time while adhering to best practices in coding and design. Passionate about leveraging the latest technologies to drive innovation and enhance application functionality. Willingness to take on added responsibilities to meet team goals. Ability to **handle multiple projects simultaneously with a high degree of accuracy.**

EDUCATION

Bachelor of Information Technology, 2015 - 2019 Rathinam Technical Campus affiliated by Anna University, Coimbatore.

EXPERIENCE

Senior Flutter Developer at KAPTAS Technologies

Jun 2022 - Present

- Prototyping and Strong **design patterns** in mobile applications
- Implement **pixel-perfect UI designs**
- Mentoring team members to complete the **project modules on time**
- Implemented comprehensive **project management methodologies** to drive successful product launches, resulting in a **30% increase in revenue**
- Implemented the **MVC pattern** to streamline code structure, resulting in **40% faster load times** and improved **scalability** for future enhancements
- **Implemented Code reusability** via **widgets customization** in all projects
- Effective State management by **BLOC, GETX Patterns**
- Upgraded **Exception Handling** that reduces 60 - 70% bugs
- **Clean architecture** and implementation of sample test cases
- Ability to implement **RESTful API integrations** which were written by **Laravel, NodeJS and Spring boot** with clear cut functionalities
- Managing code in **Git source control**
- Experienced in current projects phases using **Agile methodologies** which helps me deliver product requirements on time while promoting collaboration within the team
- Using **Appium** inspector to support QA automation testing, ensuring that our applications function correctly across different devices and platforms.
- Experienced in managing **Google Play** and **iOS App Store releases**

Full Stack Mobile Developer at Ad Intra Logs

Nov 2019 - Jun 2022

- **RESTful API integrations** which were written by back-end services like **GRAPHQL, NodeJS** and **Golang**
- Implement **pixel-perfect UI designs with responsive**
- Maintaining **Code Reusability** and **Flexibility**.
- Effective State management by **BLOC, GETX Patterns**.
- Creating simple **REST API** including app configurations & payment integrations using **Golang**
- **Taking ownership** of given projects and ensure on time delivery
- Proficiency in version control using **GIT**
- Experienced in managing **Google Play** and **iOS App Store releases**
- **Mentoring juniors** to learn and understand about all concepts in Flutter
- Experienced in managing **App production releases** on both platforms Android and IOS

IT Trainee at IGENIUS

Jun 2019 - Nov 2019

- Implemented job searching web application using **WordPress**.
- Learned **HTML** and **CSS** in a short time period and used in website **UI** designs.
- Studied core **PHP** during the training period and tried to develop simple template design like Flipkart with the product listing and search functionalities.

TECH SKILLS

- Flutter and Dart
- Firebase **Fire store, Authentication, Push notifications, Crashlytics, Remote config, App distribution** and **Cloud functions**
- Payment Gateway Integrations using **Stripe** and **Razor pay**
- Proficiency in version control tools: **Git, GitHub** and **Bitbucket**
- Proficiency in Agile tools: **JIRA, Taiga** and **Trello**
- Proficiency in Bug tracking tools like **Bugzilla**
- Expertise in **REST API** Integration written by **NodeJS, Laravel, GRAPHQL** and **Spring Boot** and Third-Party API Integrations
- Knowledge about **SOAP** API Integration in Flutter
- State management using **GETX, Provider, BLOC** Pattern, **MOBX** and **River pod**
- Local storage management like **Shared Preference, Get Storage** and currently learning **SQLite** and **Hive**
- Design patterns like **MVC, MVVM** and **Clean architecture**
- Golang
- Widget testing
- Integration testing
- Unit testing
- Appium testing
- Continuous Integration (Jenkins, Semaphore, Fastlane)
- HTML and CSS
- WordPress
- ReactJS

SOFT SKILLS

- Collaboration between team members and strong communication
- Adaptability
- Continuous improvement
- Attention to detail

- Time management
- Team work
- Conflict resolution
- Problem solving ability and logical thinking
- Strong debugging and testing skills.
- Efficient programming skills
- Ensures On time delivery

LIVE PROJECTS

1. **Garage Automate Admin app** provides exclusive, tailor-made solutions for garage owners to manage their business in the smartest way possible. With extensive reports related to operations, productivity, inventory management, accounting etc.
Technologies used - **Dart, Firebase Push notifications, AWS, Laravel.**
App link - <https://play.google.com/store/apps/details?id=in.garagemanagement.automate>
2. **Geco FMS** is a distributed system developed to maintain the employee details and the company workflow process systematically. This helps to eliminate the manual process and saves a lot of time and money. This helps improve employee satisfaction and productivity to help a company achieve their overall goals.
Technologies used - **Dart, Firebase push notifications, Laravel.**
App link - <https://play.google.com/store/apps/details?id=com.gecogroupindia>
3. **Event Go Here** - Event Go Here Mobile app helps the app user to retrieve visitor information by scanning the visitor badge (QR Code). App user also able to update product interest and comments about the visitor. It offers Offline data store and sync.
Technologies used - **Dart, AWS, Laravel.**
App link - <https://play.google.com/store/apps/details?id=com.centrix.EventGoHere>
4. **House of chefs Customer app** - At House of Chefs, we believe in health is wealth. Home food is always a privilege, especially with our hectic life schedules. Here we bring you the home food from House of Chefs without compromising the taste and quality. Modules are Product catalog, Kitchen, Ordering and Rating.
Technologies used - **Dart, Firebase push notifications, Razor pay, AWS, Laravel.**
App link - https://play.google.com/store/apps/details?id=com.app.hoc_customer
5. **Community Aura** is redefining Apartment living by providing an easy way to connect, seek and share information, interact and have fun with your fellow residents. Responsibilities are implementation of signup with referral contact details and sent mail to admin using **firebase cloud functions with Flutter**. Fetching referral type from **Fire store** collection.
Technologies used - **Dart, Firebase push notifications, Firebase Fire store, Firebase Cloud functions, AWS.**
App link - <https://play.google.com/store/apps/details?id=com.communityaura.social>
6. **Nearle Commerce** (Neighborhood commerce)
Great exploration of business from small area to large community. Provides analysis about customers and helps to promote the best products to all customers via promotions. Order tracking to make product deliverable. Tenant Live location capturing for providing right service to the right customer at the moment.
Technologies used - **Dart, Firebase push notifications, Fire store, Golang, GRAPHQL, Digital Ocean, Docker and Kubernetes.**
App link - <https://play.google.com/store/apps/details?id=com.nearle.gear>
7. **Engaje** (Ecommerce Platform)

Engaje allows a local business to engage with their customers effectively. Core features: Ordering, Appointment booking and Handyman service booking. The Engaje app has the power to support your favorite butcher, baker, café or greengrocer all in the same place.

Technologies used - **Dart, Firebase push notifications, Fire store, Golang, GraphQL, Digital Ocean, Docker and Kubernetes.**

App link - <https://play.google.com/store/apps/details?id=com.engaje.business>

IN-HOUSE PROJECTS

1. **Lightning 360** helps you organize daily work assignments and enables measuring productivity. Stay informed and connected with all your tasks with real-time status updates on your mobile. Core features are Asset management, Deployment & Returns, Asset Swap, Spare parts consumption and Task management.
Technologies used - **Dart, Firebase push notifications, AWS, Spring Boot, NodeJS.**
2. **Automate Customer app** – It's a mobile app for customers to create appointment and booking service for their vehicles regular service. Core modules are Manage appointments, Upcoming services and History.
Users can track ongoing services within the app.
Technologies used - **Dart, Laravel.**
3. **C-KYC** - It is a Mobile app that helps to do the verification process for customers to Reviewing and verifying the identity of customers. Establishes customer identity.
Technologies used - **Dart, AWS, NodeJS.**
4. **Stay Navigator** – It is a home stay booking web application that having booking, document upload and feedback module. I'm spearheading the development of visitor documents and feedback module with mobile responsive.
Technologies used - **Dart, Firebase Fire store and Cloud functions**
5. **Asset Counting App** – It is an Asset counting mobile application which is used to add assets in to the system in their respective categories like **Vehicle, Battery and Charger**. It has search option to fetch asset details by id and having **QR scan** option to fetch asset number by using Asset QR images.
Technologies used - **Dart, AWS, Spring Boot, NodeJS.**
